KATIMEX® FLEXI PROBE 2.0, 7 MM Ø

Article number: 141072

Katimex® Flexi Probe 2.0. Due to its conical shape, the Flexi Probe 2.0 offers optimum force transmission of the bending forces into the fiberglass profile when passing through tight bends. The probe is not subject to material fatigue such as a spring guide head. Together with the new initial sleeve 2.0, it forms the optimum tool for passing through very tight bends. Bending radii of 30 mm are feasible. Head Ø 7 mm
